NEW JET 12-IN. JOINTER/PLANER HANDLES STOCK UP TO 55 INCHES LONG

ELGIN, Ill. – When selecting a combination machine, there usually are sacrifices involved with features, capabilities and performance. That's not evident with the new JET® 12-in Jointer/Planer. This combination stationary power tool offers the complete package.

For joinery, this capable jointer will joint stock up to 12 in. wide and 1/8 in. deep per pass. It also can handle extra-long pieces of wood up to 55 in. with its two adjustable 27-in. infeed and outfeed tables.. **A rabbeting ledge provides for precise rabbets.** The jointer has a 43 in. L x 6 in. H pick-off fence that tilts right 45 and 90° for bevel cuts.

Converting from jointer to planer is accomplished by releasing a handle on each feed table and lifting the bed 90 degrees. Large handles and oversized springs make lifting the table easy and a built-in safety lock prevents it from falling.

The planer shares three standard, high-speed-steel cutter knives with the jointer that run at 5500 rpm and make 16,500 cuts per minute. The knives measure 12 in. L x 1-1/2 in. W. The machine planes rough stock, virtually snipe-free, up to 12 in. wide at a rate of 5/32 in. per pass..

The 12-in. jointer/planer features a sturdy, half-closed, chip-resistant, powder-coated stand.

The logo for JET, featuring the word "JET" in a bold, black, sans-serif font. Above the letters "E" and "T" is a thick red horizontal bar.The logo for WILTON, featuring the word "WILTON" in a blue, sans-serif font. The letter "O" is stylized with a circular graphic element.The logo for POWERMATIC, featuring the word "POWERMATIC" in a bold, italicized, gold-colored font.

JET 12 in. Jointer/Planer/Add One

The cast-iron bed is precision ground and polished for consistently smooth operation. An integrated 4-in. dust-collection port provides efficient removal of dust, chips and other debris when in either jointer or planer mode.

The combination machine is powered by a 16-amp, 3 hp TEFC, single-phase motor that's pre-wired for 230 volts. The belt-drive system delivers constant and consistent power. The 529-lb. planer is 33-1/2 in. H.

The JET® 12-in Jointer/Planer (JJP-12, Stk. #708475) will be available at local industrial distributors and jettools.com in October 2007.

WMH TOOL GROUP, Inc. is a subsidiary of Walter Meier Holding and is the proud owner of WILTON®, JET®, and POWERMATIC® brands. With over 1900 employees worldwide, Walter Meier Holding's dynamic organization delivers top quality products and service. WMH Tool Group is headquartered in Elgin, IL, and has more 5,000 dealers nationwide. From metal and woodworking machinery to material handling equipment, our industry leading products offer unsurpassed power and precision. It is this dedication to excellence that makes WMH Tool Group the preferred supplier in the industrial marketplace.
